A portable floor from HARO Sports was used for the first time at the Olympic Games in Munich for Basketball in 1972. Already then it was met with an enthusiastic response from both the athletes and the organisation committee. Since then, the floor has been installed in over 22 countries around the world and is even used for sports-physiological research at the institute of biomechanics of the University of Southern California (USC) in Los Angeles.

ROME TENNIS

IT IS THE BIG POINTS THAT DECIDE THE GAME...

...every tennis player knows this! And he also knows how important the sports-physiological characteristics of a floor are for that. HARO SPORTS Flooring and Rebound Ace® have now reacted to the increasing demand for floors with higher shock absorption on the one hand and a greatest possible mobility on the other. The German-Australian Double surprises the tennis scene with a real world's first: **HARO ROME TENNIS** – world's first completely mobile tennis court.

The best of two worlds: HARO SPORTS Flooring is among the world leaders in elastic-coating sports floors and provides the technical substructure for **ROME TENNIS**. For decades, Rebound Ace® has been one of

the leading manufacturers of acrylic-based sports floors and now refines the floor with its acrylic surface. The result is a superlative tennis court. Its performance data speaks for itself:

Mean values according to DIN V 18032-2; April 2001	
Shock absorption, KA 55	68 %
Resilience, vertical deflection, StVv	3,6 mm (5/32")
Deformation control, W500 I-IV	9 %
Behaviour under rolling load, load per axle without damage, VRL	1.500 N
Ball rebound, BR	98 %
Slip resistance	68 BPN
ITF Pace Rating	Medium

WINNER OF THE MATCH WITHIN 180 MINUTES

Tennishalle TC Blau-Weiß Dresden, GER	2012
Nike Clash of the Champions, Eugene, USA	2011

ROME TENNIS – the world's first completely portable tennis floor made its debut at the show tournament Nike® Clash of the Champions in March 2011. In the arena of the University of Oregon superstars such as Roger Federer, Rafael Nadal or Maria Sharapowa played on the court. Even US tennis legend John McEnroe, who came as a surprise guest, "tested" the floor revolution by HARO SPORTS and Rebound Ace®.

Time is money. Six people can install a court of 800 m² in less than three hours. With more staff this can be done even faster. Of course, the same applies for the removal. Within a single day the floor can be installed and removed, even with a match in between.

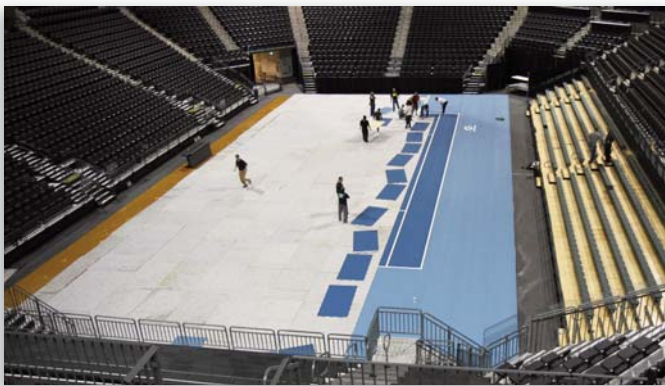

Investing in the future. The high quality of the basic structure and finish makes it possible to install und remove **ROME TENNIS** hundreds of times. No other portable court system on the market offers this combination of top performance and perfect logistics.

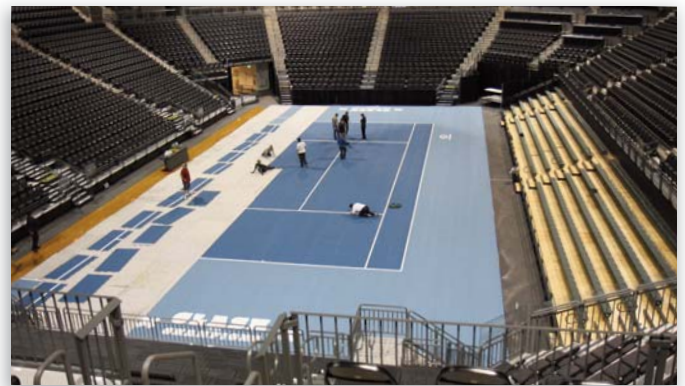

ROME TENNIS

ROME TENNIS is synonymous with superior performance. World's first mobile tennis floor clearly exceeds all standards.

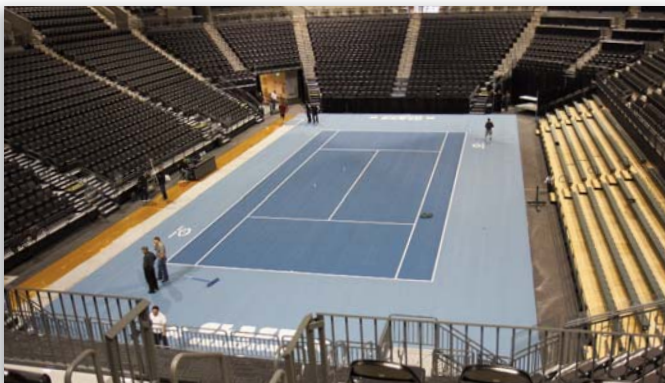

Jungfrauoch, Top of Europe

ROME TENNIS can be installed in only three hours...

...and be removed in an even shorter period of time.

With this world's first, HARO SPORTS Flooring succeeded in...

...immediately amazing players, investors and arena operators equally.

ROME TENNIS: ALSO ECONOMICALLY SUPREME

Under the brand name HARO SPORTS Flooring, portable and fixed-installed elastic-coating sports floors have been produced at the company's Sports Floor Division since 1956. Experienced experts ensure extensive advice and high-class service on every continent on earth. At HARO SPORTS Flooring, arena operators, tournament hosts or top clubs will most certainly find the perfect solution for a portable tennis court.

Flexible installation. Within less than three hours a normal indoor tennis centre turns into a world-class arena. ROME TENNIS even meets the requirements for professional tournaments with an ATP, WTA or ITF certificate. Now, tournaments and show matches can also take place in sport arenas or multiple-purpose halls that are not only designated for tennis. With **ROME TENNIS**, moving into arenas with more seating places, better illumination or infrastructure is now easier than ever before.

Individual design. Mobility and performance are one thing. **ROME TENNIS** also scores with its design. The

acrylic surface can be delivered in 12 trend colours as standard, on demand also in any other RAL colour.

„The Rebound Ace surface plays beautifully and consistently night after night on the PowerShare Series. I know I can count on it for true bounces and an even pace no matter what arena we are playing in.”

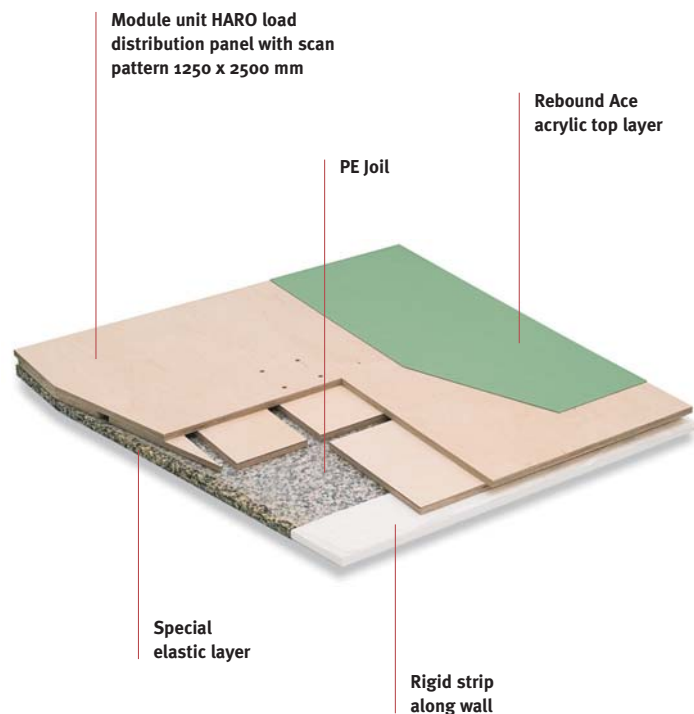

Quote by Jim Courier during the PowerShare Series 2012.

WTA 3 Practise Courts, Singapore 2014

MONTREAL TENNIS

HARO benefits: Mostly, the big tournaments are staged on mobile floors. For the trainings it is rather the fixed-installed systems that are used. With our elastic-coating floor **MONTREAL TENNIS**, HARO SPORTS is your ideal partner for this. This floor offers the same technical and sports-physiological characteristics as its mobile equivalent **ROME TENNIS**. Thanks to prefabricated modules this sports floor can be easily and quickly installed. Simply the perfect team for training and match.

Mean values according to DIN V 18032-2:

Shock absorption, KA 55	59 %
Resilience, vertical deflection, StVv	2,6 mm (3/32")
Deformation control, W ₅₀₀ I-IV	11 %
Behaviour under rolling load, load per axle without damage, VRL	1.500 N
Ball rebound, BR	97 %

ROME TENNIS: Possible colour variation.

HARO SPORTS FLOORS – BASIS FOR A POWERFUL PERFORMANCE

We leave nothing to chance when it comes to the quality of our products. From the careful selection of the raw material and continuous in-process inspection through to assembly, delivery and installation, our products are always in the hands of experienced specialists. Winners in every discipline.

HARO ROME TENNIS

- is tested according to DIN V 18032-2; April 2001 as well as EN 14904 and therefore applicable for Olympic Games, Continental and World Championships.
- is world-wide at home.
- is manufactured on the most advanced production facilities.
- is quality-assured by a Quality Management System and produced in strict compliance with the ISO 9001 standard. Whether our sports floor is installed in the USA, Japan or Germany, the performance of the floor will always meet the stringent HARO quality standards.
- meets all five requirements of the most recent DIN 18032-2 standard of April 2001. Only the dynamic friction coefficient is adapted to the requirements of Tennis.
- gives your players the safety they need to play to full tilt.
- gives your arena the inimitable look you will be envied for.

Visit us or one of “our” many professional arenas and see for yourself why we are dominating the game.
